

**2023 Equine Prohibited Substances List CONTROLLED
MEDICATION**

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

SUBSTANCE	ACTIVITY
17-Alpha-Hydroxy Progesterone FEMALES	Hormone
Acepromazine	Sedative
Acetazolamide	Carbonic Anhydrase Inhibitor
Acetaminophen (Paracetamol)	Analgesic
Adrenaline	Stimulant
Adrenocorticotrophic hormone (ACTH)	Hormone
Aformoterol	Bronchodilator
Albuterol (Salbutamol)	Bronchodilator
Alpha-Casozepine	Sedative
Altrenogest (in males and geldings)	Oestrus suppression
Amantadine	Dopaminergic
Ambroxol	Mucolytic
Amcinonide	Corticosteroid
Aminocaproic acid	Haemostatic (anti-fibrinolytic)
Aminophylline	Bronchodilator
Aminorex	Parasympathomimetic
Amiodarone	Anti-arrhythmic
Atipamezole	Alpha adrenergic antagonist
Atropine (<i>Specified Substance</i>)	Anticholinergic
Azathioprine	Immunosuppressant
Beclomethasone	Corticosteroid
Benzocaine (Ethyl Aminobenzoate)	Local anaesthetic
Betamethasone	Corticosteroid
Bethanechol	Parasympathetic agonist
Brinzolamide	Diuretic
Bromhexine	Mucolytic
Brompheniramine	Antihistamine
Budesonide	Corticosteroid
Bupivacaine	Local anaesthetic
Buprenorphine	Opioid
Butorphanol	Opioid
Butylscopolamine	Anticholinergic
Caffeine (<i>Specified Substance</i>)	Central nervous system stimulant
Calcium dobesilate	Vasotropic
Cannabidiol (CBD, CBDA) (<i>Specified Substance</i>)	Psychotropic
Captopril	Angiotensin-converting enzyme inhibitor

**2023 Equine Prohibited Substances List CONTROLLED
MEDICATION**

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

Carbamazepine	Anticonvulsant
Carbon dioxide (CO ₂)	Threshold substance: 36 millimoles per litre in plasma.
Carprofen	Non-steroidal anti-inflammatory drug
CBD (Cannabidiol, CBDA) (<i>Specified Substance</i>)	Psychotropic
CBDA (Cannabidiol, CBD) (<i>Specified Substance</i>)	
Ceterizine	Antihistamine [Alternative spelling]
Cetirizine	Antihistamine
Chlorothiazide (Chlorthiazide)	Diuretic
Chlorpheniramine	Antihistamine
Chlorthiazide (Chlorothiazide)	Diuretic
Ciclesonide	Corticosteroid
Clanobutin	Choleretic
Clenbuterol	Bronchodilator
Clobetasol	Corticosteroid
Clodronic Acid	Bisphosphonate
Clonidine	Antihypertensive
Clopidogrel	Platelet agglutination inhibitor
Cobalt	Erythropoiesis
Codeine (<i>Specified Substance when detected as a metabolite of morphine</i>)	Analgesic
Cortisone	Corticosteroid
Cromoglycate	Antihistamine
Cromolyn	Bronchodilator
Cyproheptadine	Antihistamine
Dantrolene	Muscle relaxant
Dembrexine	Mucolytic
Deracoxib	Non-steroidal anti-inflammatory drug
Desmethylpyrilamine	Antihistamine
Detomidine	Sedative
Dexamethasone	Corticosteroid
Diazepam	Anxiolytic
Dichloroacetate	Lactanase
Diclofenac	Non-steroidal anti-inflammatory drug
Digoxin	Anti-arrhythmic
Diltiazem	Antihypertensive
Dimethyl Sulphoxide (DMSO)	Solvent. Threshold substance: 15 micrograms per millilitre in urine, or 1 microgram per ml in plasma.

**2023 Equine Prohibited Substances List CONTROLLED
MEDICATION**

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

Diphenhydramine	Antihistamine
Dipyrrone (Metamizole)	Non-steroidal anti-inflammatory drug
DMSO (Dimethyl Sulphoxide)	Solvent. Threshold substance: 15 micrograms per millilitre in urine, or 1 microgram per ml in plasma.
Dobutamine	Sympathomimetic
Dopamine	Stimulant: Threshold substance controlled by 4 µg/ml in urine for 3-methoxytyramine
Dorzolamide	Carbonic Anhydrase Inhibitor
Doxapram	Stimulant
Doxylamine	Antihistamine
Drotaverine	Phosphodiesterase inhibitor
Eltenac	Non-steroidal anti-inflammatory drug
Estrone	Oestrogen
Ethanol	Sedative and neurolytic
Ethyl Aminobenzoate (Benzocaine)	Local anaesthetic
Felbinac	Non-steroidal anti-inflammatory drug
Fenoterol	Bronchodilator
Fentanyl	Opioid analgesic
Fexofenadine	Antihistamine
Firocoxib	Non-steroidal anti-inflammatory drug
Flumetasone (Flumethasone)	Corticosteroid
Flumethasone (Flumetasone)	Corticosteroid
Flunixin	Non-steroidal anti-inflammatory drug
Fluticasone	Corticosteroid
Formoterol	Bronchodilator
Furosemide	Diuretic
Gabapentin	Anti-epileptic
Glycopyrrolate	Anticholinergic
Grapiprant	Non-steroidal anti-inflammatory drug
Guaifenesin	Expectorant
Harpagoside	Anti-inflammatory
Hordenine (<i>Specified Substance</i>)	Norepinephrine stimulant
Hydrochlorothiazide (Hydrochlorothiazide)	Diuretic
Hydrochlorothiazide (Hydrochlorothiazide)	Diuretic
Hydrocortisone	Corticosteroid. Threshold substance: 1 microgram per millilitre in urine.
Hydroxyzine	Sedative
Hyoscine (Scopolamine) (<i>Specified Substance</i>)	Parasympathetic
Ibuprofen	Non-steroidal anti-inflammatory drug

**2023 Equine Prohibited Substances List CONTROLLED
MEDICATION**

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

Indacaterol	Beta 2 adrenergic agonist
Indomethacin	Non-steroidal anti-inflammatory drug
Ipratropium	Bronchodilator/ Muscarinic antagonist
Isoflupredone	Corticosteroid
Isoxsuprine	Vasodilator
Ketamine	Anaesthetic
Ketoprofen	Non-steroidal anti-inflammatory drug
Ketorolac	Non-steroidal anti-inflammatory drug
Levocabastine	Antihistamine
Levomethadone	Opioid analgesic
Levamisole	Imidazothizoles
Levothyroxine	Hormone
Lidocaine	Local anaesthetic
Loperamide	Antidiarrhoea
Loratadine	Antihistamine
Magnesium sulphate (injection)	Sedative
Meclofenamic acid	Non-steroidal anti-inflammatory drug
Medetomidine	Sedative
Meloxicam	Non-steroidal anti-inflammatory drug
Mepivacaine	Local anaesthetic
Mepyramine (Pyrilamine)	Antihistamine
Metamizole (Dipyrone)	Non-steroidal anti-inflammatory drug
Metformin	Antidiabetic
Methadone	Opioid analgesic
Methocarbamol	Muscle relaxant
Methoxypromazine	Acepromazine derivative
Methylprednisolone	Corticosteroid
Methylsalicylic acid	Non-steroidal anti-inflammatory drug
Metoclopramide	Antiemetic
Midazolam	Anxiolytic
Morphine (<i>Specified Substance</i>)	Opioid analgesic
Naloxone	Opioid antagonist
Naproxen	Non-steroidal anti-inflammatory drug
N-butyl Scopolamine	Parasympathetic
Neostigmine	Anticholinesterase
Nitroglycerin	Anti-angina
Norepinephrine	Stimulant
Olodaterol	Bronchodilator

**2023 Equine Prohibited Substances List CONTROLLED
MEDICATION**

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

Oxazepam	Anxiolytic
Oxyphenbutazone	Non-steroidal anti-inflammatory drug
Oxytocin	Hormone
Palmitoylethanolamid	Analgesic
Paracetamol (Acetaminophen)	Analgesic
Paraxanthine	Stimulant
Pentoxifylline	Vasodilator
Pergolide	Dopamine agonist
Pheniramine	Antihistamine
Phenylbutazone	Non-steroidal anti-inflammatory drug
Phenylephrine	Stimulant
Phenytoin	Anticonvulsant
Physostigmine	Pain relief
Pirbuterol	Bronchodilator
Piroxicam	Non-steroidal anti-inflammatory drug
Pitcher Plant Extract	Analgesic (putative)
Potassium Bromide	Anti-convulsant
Pramoxine	Topical anaesthetic
Prazosin	Antihypertensive
Prednisolone	Corticosteroid. Threshold substance: 0.01µg free prednisolone per millilitre in urine
Prednisone	Corticosteroid
Prifinium Bromide	Antispasmodic
Prilocaine	Local anaesthetic
Procainamide	Anti-arrhythmic
Procaine	Local anaesthetic
Promazine	Tranquiliser
Propantheline (Propanthelline)	Antimuscarinic
Propanthelline (Propantheline)	Antimuscarinic
Propentofylline	Bronchodilator
Propofol	IV anaesthetic
Propranolol	Beta blocker
Pyrilamine (Mepyramine)	Antihistamine
Pyrimethamine	Antimalarial
Quinethazone	Diuretic
Quinidine	Anti-arrhythmic
Quinine	Antipyretic
Romifidine	Tranquiliser

**2023 Equine Prohibited Substances List CONTROLLED
MEDICATION**

- Prohibited Substances include any other substance with a similar chemical structure or similar biological effect(s).
- Prohibited Substances that are identified as Specified Substances in the List below should not in any way be considered less important or less dangerous than other Prohibited Substances. Rather, they are simply substances which are more likely to have been ingested by Horses for a purpose other than the enhancement of sport performance, for example, through a contaminated food substance.

Salbutamol (Albuterol)	Bronchodilator
Salicylic acid	Non-steroidal anti-inflammatory drug. Threshold substance: 750 micrograms salicylic acid per millilitre in urine, or 6.5 micrograms salicylic acid per millilitre in plasma.
Salmeterol	Bronchodilator
Scopolamine (Hyoscine) (<i>Specified Substance</i>)	Parasympathetic
Sotalol	Beta blocker
Sulfasalazine	Anti-inflammatory
Suprofen	Analgesic
Suxibuzone	Non-steroidal anti-inflammatory drug
Terbutaline	Bronchodilator
Tetracaine	Local anaesthetic
Thenoic acid	d-amino acid oxidase inhibitor
Theobromine (<i>Specified Substance</i>)	Vasodilator
Theophylline (<i>Specified Substance</i>)	Bronchodilator
Tiletamine	Anaesthetic
Tiludronic acid	Bone metabolism agent
Timolol	Beta blocker
Tiotropium	Bronchodilator
Tranexamic acid	Haemostatic
Triamcinolone	Corticosteroid
Triamcinolone acetonide	Corticosteroid
Triamcinolone hexacetonide	Corticosteroid
Trichlormethiazide	Diuretic
Tripelennamine	Antihistamine
Trometamol	Diuretic
Tropicamide	Acetylcholine inhibitor
Valerenic acid	Tranquilliser
Vedaprofen	Non-steroidal anti-inflammatory drug
Vilanterol	Beta 2 adrenergic agonist
Xylazine	Sedative
Yohimbine	Stimulant
Zolazepam	Anaesthetic
